With the assistance of Heaven's Gain Ministries, please offer our burial choices to these families. We would be honored if you would consider our caskets and urns for babies who leave too soon. To assist you in selecting the correct size casket, a size chart is available on the back cover of this catalog.

### *Preserving Babies Too Small to Embalm*

By using our tub or vessels with saline solution, you can recreate a womb-like environment. If still in the womb, the baby would be peacefully floating in his/her own amniotic fluid. The baby is be suspended in the natural state of water as nature intended at such an early age, as opposed to being completely exposed to the outside environment. This process rehydrates the baby's body, as opposed to dehydrating like so many chemicals. This change in appearance allows children and family members to view the baby while keeping the baby's body safe. The saline bath also allows for beautiful pictures.

Visit the saline page to read FAQs and watch the short video of this amazing transformation using the saline bath technique. The transformation can be seen at the end of the video.
